

In these times it is more important than ever to stay true to yourself. To prevent the chaos around us from gaining the upper hand in us. Genetic shocks also still play a role, so there is work to be done for all of us.

In Memoriam

In February we said goodbye to Jeanne Evens. In addition to being a therapist in developmental motor skills, Jeanne, together with Helma, made an enormous contribution to the archive that shaped the foundation. For years they made transcripts of large series of lectures, not just like that, but with a beautiful layout and provided with many pictures and music lyrics. In addition, together with Helma she has worked out the five-year professional training that Niek gave, per day, for the purpose of re-registration with the professional association, the VBAG. The practical workbook is also from their hands.

It must have been a warm reunion between Jeanne and Niek.

We wish her loved ones much strength once again.

Progress of new therapists

This month the first therapist will accompany an experienced therapist. That is quite a puzzle, the time that both works must be correct, the patient must give permission, it must be evaluate afterwards. We are happy that a start is being made. In the meantime, 2 more people have registered, which brings the total to 12.

10 years

We have received many positive reactions to the booklet about 10 years of the foundation. Our thanks for this.

The place is here,

the time is now

and I am the center of my own experience

Niek Brouw

Content and financial annual report

Enclosed you will find the content and financial annual report.

It was an eventful year and we are happy that we were able to continue with Martine and Vitaal. Niek has prepared a good foundation for us.

Kind regards,

Valerie van Burk, Rens Looij and Mim van der Meij
